

PERSONAL STATEMENT

I'm a 30 year old Architect on track to licensure from Trujillo Alto, Puerto Rico. I love everything that has to do with design, but my experience in architecture is mainly in high-end residential projects. With a passionate belief that great design can enhance lives and make a difference to those that use and engage with it, my process involves examining each project's context in order to come up with design solutions that cater to the client's needs and expectations. I enjoy working with people and being part of a motivated team with diverse challenges and daring goals.
